
DYNEX POWER INC.

**REPORT FOR THE QUARTER ENDED
MARCH 31ST 2014**

Our objectives are

To grow and develop as a leading manufacturer of high power and high reliability electronic products

Our key values are

Customers

Delivering confidence in our products and services through applying high standards of quality and service whilst maintaining a personal and flexible approach to our customers.

Engineering

Enabling access to the best engineering skills and applying the highest technical standards to our customers' requirements.

Profitability

Sustaining and developing our business through directing efforts into the most profitable sectors of our business.

Integrity

Being honest, straightforward and reliable in dealing with people across all areas of our business.

This report may contain forward looking statements that involve a number of risks and uncertainties, including statements regarding the outlook for the Group's business and results of operations. By nature, these risks and uncertainties could cause actual results to differ materially from those indicated. Dynex disclaims any intention or obligation to update or revise any forward looking statement whether as a result of new information, future events or otherwise.

Company Profile

Dynex is one of the world's leading suppliers of specialist, high power semiconductor products. Dynex Semiconductor Limited is its only operating business and is based in Lincoln, England in a facility housing the fully integrated silicon fabrication, assembly and test, sales, design and development operations. The Company designs and manufactures high power bipolar discrete semiconductors, high power insulated gate bipolar transistor (IGBT) modules and die, high power electronic assemblies, and radiation hard silicon-on-sapphire integrated circuits (SOS IC's). Dynex power products are used worldwide in power electronic applications including rail traction motor drives, electric power transmission and distribution, renewable and distributed energy, marine traction motor drives, aerospace, electric vehicles, industrial automation and controls and power supplies. SOS IC products are used in demanding applications in the aerospace industry.

Company Facts

- Dynex Power Inc. was formed in June 1999
- Dynex Semiconductor Limited was formed to acquire the assets of the Lincoln Business Unit in January 2000
- The Lincoln Business Unit was founded in Lincoln England in 1956 and since that time has traded as:
 - AEI Semiconductors Ltd (AEI)
 - Marconi Electronic Devices Ltd (MEDL)
 - GEC-Plessey Semiconductors Ltd. (GPS)
- Zhuzhou CSR Times Electric Co., Ltd acquired 75% of the common shares of Dynex Power Inc. in October 2008
- 342 employees (March 2014)
- ISO9001:2008 and ISO14001:2004 approved
- Further information: www.dynexpower.com

Products

- High power bipolar discrete semiconductors
- High power IGBT modules and die
- High power electronic assemblies and components
- High reliability silicon-on-sapphire integrated circuits

Customers

Our customers are electronic equipment manufacturers and maintenance providers in the following sectors:

- Railway propulsion and on-board systems
- Industrial
 - Electric power transmission and distribution
 - Renewable and distributed power
 - Heavy industries such as steel and mining
 - Factory automation
- Marine propulsion and on-board systems
- Aircraft power electronic systems
- Space satellite applications
- Electric vehicles

Letter to Shareholders

Dynex financial results for the first quarter of 2014 improved compared to the previous quarter, and are better than the same period last year, yet are not reaching management's expectations. The revenue was fully in line with our plans and forecast, but the gross profit was adversely impacted by new product costs.

As reported recently, Dynex had incurred losses associated with yield during the manufacture of certain new products. Despite some improvement during February and March, it was not possible to sustain that improvement into the second quarter without implementing certain changes to manufacturing. Notwithstanding this difficulty, the demand for our product from our customer has increased. To support this increase in demand, to increase capacity for certain new processes and to overcome the recently experienced difficulties in sustaining the production yield, we identified the need to improve certain production processes in order to consistently realize the new product selection standards. We determined that the next step was to install some specialised equipment that would give us better control of key production processes. As reported in April 2014, Dynex borrowed \$5.1 million from CSR Times Electric in order to acquire this new equipment quickly. This equipment is in the process of being acquired and rapidly installed at Dynex and will be in production in the second half of this year.

Until such time as this new equipment and the amendments to the product design are fully implemented, it is anticipated that both our revenues and our profitability will be adversely affected. Fortunately, we are receiving strong support from CSR Times Electric and with their help we anticipate a recovery in the revenues and profitability due to these new products during the second half of the year.

Following a strong level of new contracts received last year for power electronic assemblies, this product line has been very busy in the first quarter. Due to the nature of some of these contracts, this increased activity is not reflected in the revenues or profit results, but will have a positive effect in the second half year. This product line is also continuing to attract strong interest from our customers and we are anticipating further growth in the future. In line with this expectation Dynex will be allocating increased resources to this product line, in manufacturing, engineering and research and development.

During the quarter, Dynex announced a new agreement with CSR Times Electric to share the

costs of carrying out R&D projects for high power semiconductors. The new R&D agreement covers the funding of the R&D Centre for the period January 2014 to December 2016. It is estimated that the cost of the R&D Centre will be approximately \$35 million and it is agreed that CSR Times Electric will provide funding of 80% of the costs and that Dynex will contribute 20%.

The R&D Centre will continue to concentrate on developing new products and technologies to meet the growing demand for power semiconductor products both in China and the rest of the world. Key market sectors targeted will be railway transportation, wind power, electric grids and electric cars; key products will be IGBT modules, power electronic assemblies, high power thyristors and silicon carbide power devices.

It was also pleasing to announce that Dynex Semiconductor Ltd secured approximately \$1.8 million support from the UK Government's Regional Growth Fund. The projects being supported will develop the next generation of high power semiconductor devices and production technologies and will underpin the future of manufacturing jobs in Lincoln.

The support from the UK Regional Growth Fund and from CSR Times Electric will extend and accelerate the development of new technologies and products for Dynex. One significant aspect of this next round of R&D support will be the introduction of new products to be manufactured in China using the low cost, high technology 8-inch facility currently being ramped up in Zhuzhou. This will complement the production capability in the UK and enable Dynex to penetrate more cost sensitive and higher volume sectors.

Despite having to report a net loss in the first quarter and forecasting a further loss in the second quarter, we are fortunate in being able to sustain our high investment in R&D and sales and marketing, building a strong foundation for the future. Looking forward, we do not anticipate seeing improvements in revenue and profit performance until the second half of the year.

As ever, we are very grateful for your loyal support in sustaining your investment in Dynex alongside that of our major shareholder CSR Times Electric.

Paul Taylor
President and Chief Executive Officer
May 27th, 2014

Management's Discussion & Analysis

The following discussion and analysis should be read in conjunction with the Condensed Consolidated Financial Statements of the Company for the quarter ended March 31st, 2014.

This management's discussion and analysis contains certain forward-looking statements that involve a number of risks and uncertainties, including statements regarding the outlook for the Group's business and results of operation. By nature, these risks and uncertainties could cause actual results to differ materially from those indicated.

Introduction to the Dynex Group

Dynex Power Inc. (the "Company") was formed in Ottawa, Canada on June 15th, 1999 and is quoted on the TSX Venture Exchange under the symbol DNX. The Company has one subsidiary, Dynex Semiconductor Limited (the "Subsidiary"), which is wholly owned and based in Lincoln, England. The Company and its Subsidiary (collectively, the "Group") are engaged in the design, manufacture and sale of industrial power equipment.

Apart from a few administrative activities carried out by Dynex Power Inc., all the business of the Group is carried out by Dynex Semiconductor Limited.

In 2008, Zhuzhou CSR Times Electric Co., Ltd ("CSR Times Electric") acquired approximately 75% of the share capital of the Company and thus became the Company's immediate parent company. CSR Times Electric is itself majority owned by the CSR Group which is therefore the Company's ultimate parent company. Both CSR Times Electric and the CSR Group are established in the People's Republic of China and are themselves quoted companies.

Dynex's Business and Strategy

The Group is primarily engaged in the design, manufacture and sale of high power bipolar discrete semiconductors, high power modules (IGBTs) and die and high power electronic assemblies. The Group's aim, working within the Semiconductor Business Unit of CSR Times Electric, is to be recognised as one of the world's leading manufacturers of high power semiconductors.

The Group is also engaged in the manufacture and sale of high reliability integrated circuits. This is no longer regarded by management as a core activity of

the Group and so the Group is seeking to maximise the revenue from its remaining inventory of such devices.

All the production of the Group takes place in a single factory in Lincoln, England often using common facilities and shared staff. Consequently, the Group regards bipolar discrete, power modules and die, power electronic assemblies and integrated circuits as separate product groups for revenue analysis but does not regard them as separate operating segments for reporting purposes. The Group does not analyse gross margins, expenses, taxation, net profit or assets by product group.

Due to the nature of silicon wafer fabrication, there is a relatively high level of fixed costs in the business. Consequently, the profitability of the business is particularly responsive to the volume of production and, therefore, the overall level of revenue.

Management does not regard the business as seasonal. In the case of Power Electronic Assemblies and Integrated Circuits, small numbers of large contracts drive revenues in both these segments. The delivery of a large contract in a particular quarter can cause revenue to fluctuate significantly, giving the appearance of seasonality.

Foreign Exchange Rates

Because all of the design, manufacture and sale of products are carried out by the Subsidiary, all of these transactions are initially recorded in Sterling and have to be translated into Canadian Dollars for inclusion in the Group's financial statements. Consequently, changes in the Sterling/Canadian Dollar exchange rate can have a significant influence on reported results. The following exchange rates have been used in preparing these Condensed Consolidated Financial Statements:

| | <u>£1 equals</u> |
|------------------------------------|------------------|
| Average rate January to March 2014 | C\$1.8254 |
| Average rate January to March 2013 | C\$1.5708 |
| Rate at March 31st, 2014 | C\$1.8372 |
| Rate at December 31st, 2013 | C\$1.7620 |

As illustrated, the Canadian Dollar rate against Sterling for the first quarter of 2014 was 16% lower than in the first quarter of 2013. Consequently, exchange rate movements had a significant impact on reported revenue and expenditure in the quarter.

The Canadian Dollar rate against Sterling at March

31st, 2014 was approximately 4% weaker than the rate at December 31st, 2013. Consequently, the change in rates had a less significant impact on assets and liabilities at the period end.

Review of Operating Results

Objective

The Group's objective over the medium term is to achieve strong revenue growth whilst maintaining a gross profit percentage in the range of 20-25% so as to be able to invest strongly in research and development, cover other administrative expenses, finance charges and tax and provide shareholders with a good return on their investment in the business.

Overview

Revenue in the first quarter of 2014 was below the record level reported in the fourth quarter of 2013. Continuing problems with the yield on new products resulted in an operating loss for the quarter.

The Company's booking to billing ratio for the quarter was 0.51. The level of bookings was disappointing and reflected the current difficult conditions being faced by the Group. Management hopes to see a pickup in bookings during the second quarter.

Revenue

Revenue for the first quarter of 2014 was \$11.4 million, \$4.6 million or 66% higher than in the corresponding quarter of last year. Approximately one third of this increase was as a result of the change in exchange rates. The rest of the change comprised a major increase in sales of power modules and die and bipolar devices partially offset by small reductions in sales of power assemblies and services.

Gross Margin

The gross margin was 8.8% of revenue in the first quarter of 2014 compared to a negative gross margin of 3.6% of revenue in the first quarter of 2013. The gross margin was below the range targeted by management and reflected poor yields on new products.

Other Income

Other income for the quarter consists primarily of the sale of scrap materials. The figures for the current quarter and for the corresponding quarter of last year are not considered material.

Sales and Marketing and Admin Expenses

Management's aim is to reduce the combined sales and marketing and administration expenses as a percentage of revenue through improved efficiency. Such expenses were 10.6% of revenue in the first quarter of 2014 compared to 13.3% in the corresponding quarter of last year.

Research and Development Expenses

Management believes that it is important to increase expenditure on research and development so as to maintain the intellectual property of the Group and to be able to offer the best products to the market in order to protect long term profitability. As far as possible, management seeks to fund such expenditure from contributions from its parent company, customers and governmental agencies so that the full burden of such expenditure does not fall to shareholders.

The net expenditure on research and development for the first quarter of 2014 was \$377,000. This was \$120,000 or 47% higher than in the corresponding quarter of last year. Approximately one third of this change was a result of the change in exchange rates.

However, management believes that the gross expenditure on research and development is a more important indicator of the Group's commitment to product development. Gross research and development expenditure fell to 14.1% of revenue in the first quarter of 2014 compared to 17.2% of revenue in the corresponding quarter of last year. This fall was as a result of the significant increase in revenue between the two periods. Gross expenditure on research and development increased by 37%. Nearly half of this increase was as a result of the change in exchange rates.

Finance Costs

Finance costs for the quarter were \$158,000, compared to \$103,000 in the corresponding quarter of last year. Approximately one third of this increase is as a result of the change in exchange rates with two thirds caused by a higher level of borrowings.

Other Gains and Losses

Other gains and losses relate to foreign exchange gains and losses and profits or losses on the disposal of property, plant and equipment. Consequently, the figure reported can fluctuate significantly.

Loss before Tax

The Group reported a loss before tax in the quarter of \$634,000 compared with a loss before tax of \$1.4 million in the corresponding quarter of last year.

Income Tax Expense

The Group recorded a tax release in the quarter equivalent to 18.6% of the loss before tax compared with a release of 21.4% in the corresponding quarter of last year. The reduction reflects a fall in UK tax rates.

Net Loss

The Group reported a net loss of \$516,000 in the first quarter of 2014 compared to a net loss of \$1.1 million in the corresponding quarter of last year.

Liquidity & Capital Resources Objective

The Group's objective is to maintain a strong balance sheet so as to be able to carry out its business efficiently, to be able to grow revenue substantially over the medium term and to be in a position to take advantage of market opportunities.

Non-Current Assets

The net value of non-current assets rose from \$36.2 million at the end of last year to \$38.1 million at the end of the first quarter. Approximately 80% of this increase was as a result of changes in exchange rates.

Working Capital

The Group aims to optimise the ratio of assets invested in working capital (current assets less cash less trade payables, other payables and accruals, provisions, amounts owing to parent company and deferred tax liabilities) compared to the revenue of the business.

At the end of March 2014, working capital stood at \$16.8 million or 1.47 times first quarter revenue compared to \$17.7 million or 1.37 times quarter four revenue at the end of December 2013.

Net Debt

At the end of March 2014, the Group had net debt (borrowings less cash) of \$16.8 million. At the end of December 2013, it also had net debt of \$16.8 million.

The Group had no off balance sheet financing arrangements at the quarter end or at the previous year end.

Equity

Equity increased by \$1.0 million since the end of the preceding year. The increase resulted from the net loss of \$516,000 and an exchange gain on translation of the UK subsidiary of \$1.5 million.

Gearing

Management monitors closely the Group's gearing ratio (the ratio of net debt, being borrowings less cash balances, to equity). At the end of March 2014, the Group had a gearing ratio of 44.2%. At the end of the preceding year, the Group had a gearing ratio of 45.4%. Management does not regard this level of borrowing as excessive although in the medium to long term management intends to reduce it.

Borrowing Facilities

The Group seeks to have committed facilities sufficient to meet its expected financing needs for the next two years. At the end of March 2014, the Group's committed borrowing facility totalling \$13.9 million were fully drawn. At the quarter end, the Group was in breach of the covenants on a further facility for \$4.9 million which was fully drawn and so this facility has been classified as an uncommitted facility. The Group also maintains a \$5.5 million overdraft facility to provide access to additional funds and to help with its day-to-day cash management. This facility is also not a committed facility. At the end of the quarter, \$5.3 million was drawn under this facility. The Group had \$7.0 million of cash at the quarter end. At the quarter end, net debt was equivalent to approximately 120% of the committed facilities available to the Group.

Cash Flow

There was an inflow of \$2.4 million from operating activities in the quarter. The main constituents of the cash inflow were a reduction in working capital of \$1.6 million and depreciation of \$1.1 million partially offset by the loss before tax of \$634,000.

Commitments

The Group has capital commitments at the quarter end of \$7.0 million for intangible assets and plant and equipment for manufacturing and research and development.

Contingencies

A number of the Group's products are covered by product warranties of varying duration. The Group

provides for claims under such warranties on the basis of past experience. However, actual claims could exceed the amount of this provision.

The Group has been notified of a possible claim from a customer although no claim has been received so

far. The Group believes its liability is capped at a level that would not have a significant impact on the Group.

The Group has not issued any guarantees of any third party debts or performance.

Selected Financial Information

| | 2014 | 2013 | 2013 | 2013 | 2013 | 2012 | 2012 | 2012 | 2013 | 2012 | 2011 |

| Dividends | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

Selected quarterly and annual financial information is presented above. All figures have been prepared in accordance with IFRS. Quarterly figures have not been audited except for balance sheet figures for each of the fourth quarters. The figures for the financial years 2011, 2012 and 2013 have been audited. All amounts are stated in thousands of Canadian Dollars except for the gross profit percentage and the gross R&D percentage and for earnings per share figures which are stated in Canadian Dollars per share.

The amounts shown for non-current assets are as disclosed in the appropriate financial statements. Working capital is defined as current assets excluding cash less current liabilities excluding borrowings less non-current liabilities excluding borrowings. Net debt is defined as cash less borrowings and derivative financial instruments. The amounts shown for equity are as disclosed in the financial statements.

Annual revenue grew by approximately 10% between 2011 and 2012 and declined by approximately 1% between 2012 and 2013. Quarterly revenue has remained steady throughout most of the period apart from in the first quarter of

2013 and the last two quarters of 2013. The reduction in the first quarter of 2013 reflected a slowdown in orders for Chinese railways and overstocking of parts by our parent company and continuing weakness in European markets and delays in projects by our major customers. The last two quarters of 2013 saw a recovery in die sales to CSR Times Electric and a general recovery in other major markets.

The gross profit percentage in 2011 was in line with management expectations. The gross profit percentage in 2012 reflected the difficult economic conditions in several of the Group's markets and the extreme price pressures then being experienced. The gross profit percentage in 2012 was slightly below management expectations. The gross profit percentage in 2013 reflected the very poor revenue reported in the first quarter, the impact of sales of low margin products in the third quarter and the write off of inventory and provisioning of work in progress in the fourth quarter. The gross profit level in 2013 was significantly below management expectations. The gross profit percentage in the last three quarters of 2012 reflected the cost of preparing for future growth and the extremely price competitive nature of the markets at that time. In

2013, only in the second quarter did the gross profit percentage reach reasonable levels although still slightly below management's target level. The gross profit percentage in the first quarter of 2013 was impacted by the low sales in the quarter, which has a major impact given the high fixed cost nature of the business. Gross profit percentage in the third quarter of 2013 reflected the low margins available to the Group in some of its more competitive markets. The low gross profit percentage in the fourth quarter of 2013 resulted from major inventory write off and provisions against work in progress. The gross profit percentage increased in the first quarter of 2014 but is still below the level management expects to achieve.

Management regards research and development expenditure as key to the future of the business and seeks to grow the ratio of gross expenditure on research and development to revenue. A steady growth in gross research and development expenditure as a percentage of revenue can be seen in the figures. The rise in the ratio to 17.2% in the first quarter of 2013 reflects the fall in revenue in the quarter.

The profit before tax reflects the strength of the gross profit in any particular period. The quarterly figures follow the same trend. The net profit reflects the strength of profit before tax in any particular period. The quarterly figures follow the same trend except for the fourth quarter of 2012 where a significant release of the tax provision was achieved.

The figures for non-current assets show continued investment throughout the business. The modest decline in the first quarter of 2013 reflected management caution with regard to discretionary expenditure during a difficult period.

Working capital levels, which were generally equivalent to approximately three month's revenue in 2011, had risen to closer to four month's revenue in 2012 and to approximately five month's revenue in 2013. The figure for the first quarter of 2013 was higher than this due to the low revenue figure. The figure has fallen to between four and four and a half month's revenue in the last two quarters. The increase reflects the fact that an increasing amount of the Group's revenue is now coming from customers in areas where credit terms are generally longer and payment of receivables is not as prompt.

The Group had \$6.7 million of net debt at the end of 2011. This figure has risen steadily since then in order to fund increased investment in non-current assets, the rise in working capital referred to above and the losses in recent quarters.

The change in the equity reflects the comprehensive income in each period.

Risk Management

The Group operates in a competitive market in which the major competition comes from businesses that are much larger than Dynex and which therefore have more resources at their disposal. The purchase of a 75% stake in the Company by CSR Times Electric in October 2008 made the Group part of a larger group. The Group further tries to meet this challenge by ensuring it undertakes sufficient R&D and continuous improvements in manufacturing to maintain its product quality, product performance and delivery lead time at or ahead of the levels provided by competitors.

A fundamental shift in technologies in the Group's product markets could have a material adverse effect on its competitive position within the industry. Dynex is increasing the gross expenditure on R&D as a percentage of revenue in order to mitigate this risk.

The level of worldwide demand for power semiconductors and power semiconductor assemblies is one of the key uncertainties for the Group. Global plans to reduce carbon emissions in response to concerns about climate change, including increased power generation from non-fossil fuels, the electrification of transport systems and the increased use of advanced power electronic equipment, together with the need for additional power generation capacity and improved power transmission and distribution systems and the increased demand for the supply of high quality electrical energy, provide strong justification for believing that demand for the Group's products will remain strong in the longer-term. The purchase of a 75% stake in the Company by CSR Times Electric in October 2008 gives the Group improved access to the important Chinese market. However, any reduction in investment in these areas would be detrimental to the future of the business.

The Group has based its future business development plans on the assumption that CSR Times Electric will purchase a substantial portion of its IGBT product requirements from Dynex. This is not certain as there are many factors that could prevent CSR Times Electric purchasing such products. In particular, there is a risk that Dynex IGBT modules may prove technically incompatible or not competitive for use in CSR Times Electric equipment and that may materially reduce the future demand for IGBT modules. The Group is working closely with CSR Times Electric, has set up several joint teams and is increasing its R&D expenditure to ensure that its products are able to meet CSR Times Electric's needs and the needs of other power electronic equipment manufacturers both within China and the rest of the world.

The Group's manufacturing processes are highly complex and manufacturing efficiency is an important factor in the Group's competitiveness and profitability. The Group has been investing and continues to invest in new fabrication equipment to ensure it remains competitive.

The Group's manufacturing yields vary significantly among products, depending on the complexity of a particular product's design and the Group's experience in manufacturing that type of product, the quality of the raw materials and bought in components used in manufacture and the effects of contamination or other difficulties during the semiconductor fabrication process. Deterioration in yields will increase production costs and therefore reduce margins. In addition, failure to meet planning yields may also lead to late deliveries to customers. The Group seeks to manage these risks by constantly monitoring and seeking to improve its yields through improvements in design, materials and manufacturing processes.

The Group's business is quite concentrated, with over 75% of turnover typically coming from ten or fewer customers. The failure or consolidation of any of these customers around companies owned or supplied by Dynex's major competitors could significantly reduce the opportunities available to the business in future. The acquisition of a major stake in the Company by CSR Times Electric in October 2008 has given the Group a much closer relationship with this entity which has become the Group's major

customer. The Group has developed and works to a Quality Policy, operated under ISO 9001:2008 in order to ensure it meets its customers' requirements as well as it possibly can. The Group constantly seeks to acquire new customers to broaden its customer base.

Certain raw materials, such as silicon, neutron transmutation doped ("NTD") silicon, molybdenum, ceramic housings, substrates, baseplates, wafer fabrication chemicals and gases, electricity and assembly materials and sub-contract services are critical to the manufacture of high power semiconductors. The Group seeks to maintain close relationships with key suppliers, entering into long term supply arrangements where appropriate and by multi sourcing products where possible, in order to ensure continued access to such raw materials.

In the case of electricity, the Group is a major user of electricity and the cost of electricity in the UK is subject to significant short term variation. The Group has developed and operates a formal Energy Management Plan in order to minimise the use of power. The Group takes independent professional advice on the purchase of electricity and seeks to enter into long term contracts to reduce the uncertainty about future prices.

Many of the Group's expenses, particularly those relating to capital equipment and manufacturing overheads, are relatively fixed, making the Group's results extremely sensitive to volume reductions. The Group seeks to manage this risk by maintaining close relationships with its main customers and by seeking new customers. The Group's capability in power electronic assemblies is an important aspect of developing and maintaining such close relationships.

The Group's operating business is in Lincoln, England and the majority of its assets, liabilities, revenue, expenses and cash flows take place in and are recorded in Sterling. These values have to be translated into Canadian Dollars for inclusion in the consolidated financial statements of the Company. Movements in the Canadian Dollar-Sterling exchange rate directly affect such values. The Company does not generally hedge such exposures, believing that its shareholders have taken a positive decision to invest in a business operating out of the UK.

Although the Group buys some materials in continental Europe, the Far East and North America, the bulk of its costs are incurred in Sterling. However, it sells into world markets with many sales denominated in US dollars and Euros. As a consequence, the Group's results are affected by changes in exchange rates between these currencies. Management monitors these exposures but does not believe that it would be beneficial to hedge them at the present time. The need to undertake such hedging is reviewed from time to time.

The Group's future success depends, in part, upon its ability to attract and retain suitably qualified and experienced personnel in engineering, research and development, operations, production management, sales, marketing, finance, IT and general management. The Group seeks to ensure that its remuneration, employee benefits and general terms and conditions remain competitive to ensure it is able to recruit and retain the people it needs to be competitive.

As part of its manufacturing operations, the Group uses many hazardous chemicals and gases. The Group operates a formal Health and Safety Plan compliant with UK Health and Safety Executive guidance note HSG65 and a formal Environmental Management Plan under ISO 14001:2004 in order to ensure compliance with the relevant laws and regulations and to ensure that the risks to employees, third parties and the environment are minimised.

Financial Instruments & Other Instruments

The Group has an obligation to repay a Hong Kong Dollar loan from CSR Times Electric (Hong Kong) Ltd in 2015. A forward contract has been entered into to fix the Sterling cost of repaying this loan.

Critical Accounting Judgements and Estimates

The following are the key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year:

Anticipated useful lives of non-current assets

Management determines the estimated useful lives of its non-current assets based on historical experience

of the actual lives of non-current assets of similar nature and functions and reviews these estimates at the end of each reporting period. At March 31st, 2014 the carrying amount of non-current assets was \$38.1 million.

Provisions against inventories

Management reviews the condition of inventories at the end of each reporting period and recognises a provision for slow-moving and obsolete items of inventory when they are no longer suitable for use or sale.

Management's estimate of the net realisable value of inventories is based primarily on sales prices in the forward order book and current market conditions.

At March 31st, 2014 the provision against inventories was \$5.7 million and the carrying amount of inventories was \$12.7 million.

Impairment of trade receivables

Management determines the estimated recoverability of trade receivables based on the evaluation and ageing of trade receivables, including the current creditworthiness and the past collection history of each customer and reviews these estimates at the end of each reporting period. At March 31st, 2014 the provision was \$206,000 and the carrying amount of trade receivables was \$8.1 million.

Provisions

Management determines the best estimate of provisions based on experience of similar transactions and, in some cases, reports from independent experts and reviews them at the end of each reporting period. At March 31st, 2014 the carrying value of provisions was \$301,000.

Disclosure Controls

Disclosure controls and procedures have been designed to provide reasonable assurance that all relevant information is gathered and reported to senior management, including the Chief Executive Officer and Chief Financial Officer, on a timely basis so that appropriate decisions can be made regarding public disclosure.

Internal Controls

Internal control over financial reporting has been designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with International Financial

Reporting Standards. During the quarter ended March 31st, 2014, there have been no changes in the design of the Group's internal controls over financial reporting that has materially affected, or is reasonably likely to affect materially the Group's internal control over financial reporting.

Government Assistance

The Group received \$31,000 in grants during the quarter from the European Union and the UK Government to assist in its research and development activities and grants of \$1,000 from the UK Government to purchase equipment.

Outstanding Share Data

As of the date of this Management's Discussion and Analysis, the Company has 80,509,047 common shares outstanding. The Company has no options to purchase shares outstanding.

Related Party Transactions

During the quarter, the Group sold \$3.0 million of goods and \$337,000 of services to CSR Times Electric, received a contribution towards research and development of \$1.2 million and purchased materials and components from them for \$917,000. The Group also sold \$195,000 of goods to a fellow subsidiary of CSR Times Electric and paid \$9,000 in interest on a loan from another fellow subsidiary of CSR Times Electric. The Group incurred expenses in the UK of \$21,000 on behalf of CSR Times Electric which expenses were reimbursed to the Group.

At March 31st, 2014 the Group was owed \$2.8 million for goods and services sold to CSR Times Electric and owed them \$1.2 million for materials and components purchased from them. In addition, the Group was owed an advance payment from CSR Times Electric of \$8.3 million towards future research and development expenditure and for technical support for the construction of an 8-inch wafer fabrication facility in China. At the end of the quarter \$7.9 million was unearned income and as such is shown under other payables and accruals. The Group was also owed \$120,000 by a fellow subsidiary which is reported under trade receivables.

The Group has a loan of \$5.5 million from CSR Times Electric and a loan of \$1.1 million from a fellow subsidiary of CSR Times Electric. At March 31st, 2014 an amount of \$9,000 was outstanding for interest under these loans.

A parent company of CSR Times Electric owed the Group \$24,000 for services provided to them.

The Group paid \$266,000 in compensation during the quarter to its key management personnel.

The Group purchased services from a law firm in Canada during the quarter for \$15,000. At March 31st, 2014, \$11,000 was outstanding to this law firm. One of the Company's directors is a partner in this firm.

Subsequent Events

In April 2014, the Company announced that it had secured support of approximately \$1.8 million from the UK Government's Regional Growth Fund. The funding is linked to safeguarding existing jobs and creating 27 new positions over the next five years in the Company's R&D Centre in Lincoln, England.

Outlook

Revenue from bipolar discrete products decreased slightly in the first quarter of 2014 from the strong figure it had been in the last quarter of 2013. It is forecast to be at or slightly higher in the second quarter.

The project to expand the capacity and capability of the IGBT wafer fabrication facility was completed in 2011. Work continues on qualifying parts made on the new lines for use, particularly in CSR Times Electric applications, and on improving yields from the new lines. However, this work has taken longer than expected.

Revenue from the sale of IGBT modules and die increased significantly in the first quarter of 2014 compared with the fourth quarter of last year. It is forecast to fall below this figure in the second quarter and then to recover thereafter.

Revenue from the sales of power electronic assemblies showed a significant reduction in the first quarter of 2014. This product group remained very busy but much of the work will only be delivered to customers and, therefore, will only be billable in the second and third quarter. It is expected to show a significant increase in the second quarter.

Revenue from services remained steady in the first quarter of 2014 and should remain steady in the second quarter.

Revenue from sales of integrated circuits declined significantly in the first quarter of 2014 and is not expected to recover in the second quarter.

Overall, revenue in the first quarter of 2014 was below the record level seen in the fourth quarter of last year but was ahead of the average quarterly revenue seen in 2013. It is expected to fall slightly in the second quarter. Revenue for the full year is expected to be at or above that reported in 2013.

At the end of March 2014, the order book stood at \$25.7 million, slightly lower than the figure at the end of 2013 of \$27.9 million.

The business reported a net loss of \$516,000 in the first quarter of 2014. This was significantly lower than the loss reported in the fourth quarter of 2013. A

further loss is expected in the second quarter with the business returning to profitability in the second half of the year.

DYNEX POWER INC.

Notes to the Condensed Consolidated Financial Statements (unaudited)

Quarter Ended March 31st, 2014

1. CORPORATE INFORMATION

Dynex Power Inc. (the “Company”) was formed on June 15th, 1999 under the laws of Canada by the amalgamation of GLG Dynex Power Inc. and Dynex Power Inc. GLG Dynex Power Inc. had been incorporated under the laws of Canada on February 19th, 1996. The former Dynex Power Inc. had been incorporated under the laws of Canada in the name of DPI Technologies Inc. on February 11th, 1998 and changed its name to Dynex Power Inc. on June 4th, 1999.

The registered office of the Company is 515 Legget Drive, Suite 800, Kanata, Ontario, K2K 3G4.

The Company and its subsidiary (collectively the “Group”) are engaged in the design and manufacture of industrial power equipment.

The immediate parent company of the Group is Zhuzhou CSR Times Electric Co. Ltd (“CSR Times Electric”) and the ultimate parent company of the Group is CSR Group, which are both established in The People’s Republic of China. The ultimate controlling party is the Chinese State-owned Asset Supervision and Administration Commission based in Beijing in The People’s Republic of China.

2. BASIS OF PREPARATION

These interim condensed consolidated financial statements of the Group were prepared in accordance with International Accounting Standard (“IAS”) 34, “Interim Financial Reporting”. Therefore these interim condensed consolidated financial statements do not include all the information and disclosures that are required in annual financial statements in accordance with International Financial Reporting Standards (“IFRS”).

The preparation of financial statements requires the Group’s management to make judgements and estimates that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period presented. However, actual results could differ from the estimates made by management requiring a material adjustment to the carrying values of assets and liabilities in the future. Any changes in estimates will be treated prospectively in the period in which they change. Details of the Group’s key judgements and estimates are disclosed in Note 5 of the Group’s consolidated financial statements for the year ended December 31st, 2013.

These interim condensed consolidated financial statements have been prepared on the basis of the same policies as described in Note 4 to the Group’s consolidated financial statements for the year ended December 31st, 2013 and should be read in conjunction with those statements which are included in the Group’s Annual Report for 2013.

These interim condensed consolidated financial statements have been prepared on a going concern basis under the historical cost convention, unless otherwise noted. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

All figures are in Canadian Dollars (“\$”) which is the Company’s functional currency except as otherwise stated. The functional currency of the Company’s subsidiary, Dynex Semiconductor Limited, is British Pounds.

DYNEX POWER INC.

Notes to the Condensed Consolidated Financial Statements (unaudited)

Quarter Ended March 31st, 2014

3. FUTURE CHANGES IN ACCOUNTING POLICIES

The Company has not implemented the following new and revised accounting pronouncements that have been issued but are not yet effective. The Company has reviewed these pronouncements and determined that the following may have an impact on the Company:

IFRS 9 Financial Instruments

IFRS 9 was issued by the International Accounting Standards Board ("IASB") in November 2009 and October 2010 and will replace IAS 39. IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Two measurement categories continue to exist to account for financial liabilities in IFRS 9, fair value through profit or loss ("FVTPL") and amortized cost. Financial liabilities held-for-trading are measured at FVTPL, and all other financial liabilities are measured at amortized cost unless the fair value option is applied. The treatment of embedded derivatives under the new standard is consistent with IAS 39 and is applied to financial liabilities and non-derivative hosts not within the scope of the standard. IFRS 9 does not have a mandatory effective date; the impact of this ongoing project will be assessed by the Company as remaining phases of the project are complete.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

These interim condensed consolidated financial statements have been prepared using the same accounting policies as those used in the Group's annual financial statements for the year ended December 31st, 2013, except for the adoption of new standards and interpretations as of January 1st, 2014 noted below.

Adoption of new standards and interpretations

At January 1st, 2014 the Group adopted the following standards and interpretations, none of which had any impact on the financial position or performance of the Group:

Amendments to IAS32, "Financial Instruments: Presentation"

Amendments to IAS36, "Impairment of Assets"

IFRIC21, "Levies"

The details of these standards and interpretations were described in the Consolidated Financial Statements of the Group for the year ended December 31st, 2013.

DYNEX POWER INC.**Notes to the Condensed Consolidated Financial Statements (unaudited)****Quarter Ended March 31st, 2014****5. OPERATING SEGMENT INFORMATION**

IFRS 8 “Operating Segments” defines an operating segment as (a) a component of an entity that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity), (b) whose operating results are regularly reviewed by the entity’s chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance and (c) for which discrete financial information is available.

For management purposes the Group’s activities are attributable to a single operating segment, engaged in the design and manufacture of industrial power equipment. Consequently, the Group does not present any operating segment information.

Revenue by geographic area

The location of the customer determines the geographic areas for revenue.

| | 3 months Mar 31st 2014 | 3 months Mar 31st 2013 |
|--------------------|---------------------------------------|------------------------------|
| | \$ | \$ |
| Canada | - | 143,100 |
| United Kingdom | 3,454,546 | 1,867,142 |
| China | 3,397,056 | 1,576,160 |
| France | 1,283,170 | 881,704 |
| India | 755,334 | 151,098 |
| Other (None > 10%) | 2,559,398 | 2,257,895 |
| | 11,449,504 | 6,877,099 |

Property, plant and equipment by geographic area

The location of property, plant and equipment determines the geographic areas.

All property, plant and equipment is located in the UK.

Major customers

For the quarter ended March 31st, 2014 the Group had two customers each accounting for more than 10% of revenue, generating \$3,565,373 (CSR Times Electric Group) and \$2,611,759 respectively (Mar 31st, 2013 – two customers each accounting for more than 10% of revenue, generating \$2,165,104 (CSR Times Electric Group) and \$1,563,447 respectively).

DYNEX POWER INC.
Notes to the Condensed Consolidated Financial Statements (unaudited)
Quarter Ended March 31st, 2014

6. REVENUE AND OTHER INCOME

Revenue on sale of goods and services

Revenue on the sale of goods represents the net invoiced value of goods sold less trade discounts and allowance for returns and excludes sales tax.

Revenue for services is recognised at the contractual rates as labour hours are delivered and direct expenses are incurred.

An analysis of the Group's revenue and other income is as follows:

| | 3 months Mar 31st 2014 | 3 months Mar 31st 2013 |
|-------------------------|---------------------------------------|------------------------------|
| Revenue: | \$ | \$ |
| Sale of goods | 11,098,655 | 6,429,083 |
| Rendering of services | 350,849 | 448,016 |
| | 11,449,504 | 6,877,099 |
| Other Income: | | |
| Sale of scrap materials | 48,817 | 23,762 |
| Bank interest income | 2,143 | 92 |
| Government grants | 1,447 | 1,246 |
| Other income | 6,323 | 518 |
| | 58,730 | 25,618 |

| | 23,832,502 | 17,611,206 |

- (i) The Group has a bank loan for \$5,511,600 (Dec 31st, 2013 - \$5,286,000) under a term loan facility. The loan bears interest at UK base rate plus 2.25% and is repayable in four equal six-monthly repayments between October 2016 and April 2018. This loan is subject to certain financial covenants calculated by reference to the most recent published audited accounts of Dynex Semiconductor Limited, which as at the date of these financial statements, are the December 31, 2012 financial statements. Any potential covenant breach based on the published audited accounts of Dynex Semiconductor Limited for the year ended December 31, 2013 has not yet been assessed. The loan is secured by a first charge on property, plant and equipment (excluding the freehold land & buildings and equipment under leases and chattel mortgages) and current assets. At March 31st, 2014 these assets have a carrying value of \$67,811,112 (Dec 31st, 2013 - \$53,018,082).
- (ii) The Group has a bank loan for \$645,610 (Dec 31st, 2013 - \$659,712). The loan bears interest at an effective interest rate of 4.3% per annum and is repayable in monthly instalments between October 2013 and September 2017. The loan is secured by a chattels mortgage on equipment with a carrying value of \$738,643 (Dec 31st, 2013 - \$724,268).
- (iii) The Group has a bank overdraft of \$5,341,435 (Dec 31st, 2013 - \$4,397,089) under an approved overdraft facility of \$5,511,600 (Dec 31st, 2013 - \$5,286,000) which is repayable on demand. The overdraft bears interest at UK base rate plus 2.32% on balances up to the approved overdraft limit and at the bank's standard interest rate on balances over the approved limit. The overdraft facility is secured under the same charge as in (i) above.
- (iv) The Group has a bank loan for \$4,546,458 (Dec 31st, 2013 - \$4,796,398). The loan bears interest at LIBOR plus 2.30% and is repayable in quarterly instalments between February 2013 and August 2016. The loan is secured by a fixed charge on the freehold land and buildings which have a carrying value of \$8,269,702 (Dec 31st, 2013 - \$7,963,214). At March 31st, 2014 and December 31st, 2013 the Group was in breach of the covenants on this loan and, as a result, it has been reclassified as current borrowing in the Condensed Consolidated Statement of Financial Position.

DYNEX POWER INC.

Notes to the Condensed Consolidated Financial Statements (unaudited)

Quarter Ended March 31st, 2014

11. BORROWINGS (continued)

- (v) The Group has bank loans for \$nil (Dec 31st, 2013 - \$489,007) in respect of certain bills of exchange receivable which were discounted for immediate funds with recourse. The loans were fully repaid during the first quarter of 2014 when the bills matured. The loans were secured against the bill receivable to which they relate which have a carrying value of \$nil (Dec 31st, 2013 - \$483,492).
- (vi) The finance leases are secured by the equipment leased which has a carrying value of \$458,856 (Dec 31st, 2013 - \$487,688).
- (vii) The Group has an unsecured loan from CSR Times Electric for \$5,517,812 (Dec 31st, 2013 - \$nil). The loan bears interest at 5% per annum and is repayable in five equal six-monthly repayments between December 2016 and December 2018. (Note 14)
- (viii) The Group has an unsecured loan from a fellow subsidiary of CSR Times Electric for \$1,146,843 (Dec 31st - \$1,099,900). The loan bears interest at 3.25% and is repayable on September 7th, 2015 (Note 14).
- (ix) The Group has an unsecured interest free loan from an unrelated party for \$363,343 (Dec 31st, 2013 - \$383,318). The loan is repayable in quarterly instalments between December 2013 and September 2015.
- (x) The Group has an unsecured loan for \$405,157 (Dec 31st, 2013 - \$nil) which is repayable in ten equal monthly instalments between March 2014 and December 2014.

DYNEX POWER INC.**Notes to the Condensed Consolidated Financial Statements (unaudited)****Quarter Ended March 31st, 2014****12. SHARE CAPITAL**

At March 31st, 2014 there were 80,509,047 common shares of the company outstanding (Dec 31st, 2013 – 80,509,047).

- (i) CSR Times Electric is the Group's main distributor for high power semiconductors in The People's Republic of China and the Group is CSR Times Electric's main distributor for high power semiconductors in Europe, Africa and parts of Asia. The parts are sold to the distributor at the market price less a discount to cover the cost of the work carried out by the party handling the distribution.
- (ii) CSR Times Electric uses the Group to buy certain raw materials and to provide IGBT die and module products for its own use and to construct certain pieces of equipment for use in its IGBT assembly and test facility in Zhuzhou, China.
- (iii) On September 27th, 2011 the Group signed an agreement with CSR Times Electric for the research and development centre to provide technical support to CSR Times Electric for its 8 inch wafer fabrication facility in China. On February 7th, 2014 the Group signed a new agreement with CSR Times Electric to continue providing this support for a further three year period commencing January 1st, 2014. Under the new agreement it is estimated that the costs for the project will be \$4.7m and CSR Times Electric will pay 25% of their contribution in advance. The advance was received in April 2014.

DYNEX POWER INC.**Notes to the Condensed Consolidated Financial Statements (unaudited)****Quarter Ended March 31st, 2014****14. RELATED PARTY TRANSACTIONS AND BALANCES (continued)**

- (iv) On September 9th, 2010 the Group signed an agreement with CSR Times Electric to share the costs of carrying out research and development projects for high power semiconductor devices at the Group's premises in Lincoln, England. Under this agreement CSR Times Electric provided funding of 80% of the costs and the Group provided 20%. On February 7th, 2014 the Group signed a new agreement with CSR Times Electric to continue sharing these costs for a further three year period commencing January 1st, 2014 with CSR Times Electric continuing to provide funding of 80% of the costs and the Group 20%. Under the new agreement it is estimated that the total costs for the project will be \$36.4m and CSR Times Electric will pay 25% of their contribution in advance. The advance was received in April 2014.
- (v) From time to time the Group pays incidental expenses in the UK on behalf of CSR Times Electric. These costs are reimbursed in full.
- (vi) The Group uses CSR Times Electric to make purchases of materials and components for it in China.
- (vii) In March 2014 the Group received a loan for approximately \$5.5m from CSR Times Electric to purchase new manufacturing equipment. The loan bears interest at 5% per annum and is repayable between December 2016 and December 2018.
- (viii) The Group provided a management training course to CSR Corporation Ltd, a subsidiary of the ultimate parent company of CSR Times Electric.
- (ix) In 2011, the Group appointed Times Electric USA LLC, a fellow subsidiary of CSR Times Electric, to act as the Group's main distributor for high power semiconductors in North, Central and South America.
- (x) On September 7th, 2012 the Group was provided with a loan for approximately C\$1 million by CSR Times Electric (Hong Kong) Co., Ltd, a fellow subsidiary of CSR Times Electric, to purchase equipment. The loan bears interest at 3.25% per annum and is due to be repaid on September 7th, 2015.
- (xi) Two of the Company's non-executive directors receive a fee for their services.
- (xii) The Company retains a business law firm in Canada to provide legal services and advice. One of the Company's directors is a partner of this firm.

Advances to and from the parent company are recorded at fair value. The directors' fees and other related party amounts are recorded at the negotiated amounts. All amounts due to and from related parties, other than loans, are recorded as current liabilities and current assets since they are due upon demand or on the basis of normal creditor terms. Amounts due under loans are recorded as current liabilities or non-current liabilities according to the dates on which repayments are due to be made.

15. EVENTS AFTER THE REPORTING PERIOD

In April 2014, the Company announced that it had secured support of approximately \$1.8 million from the UK Government's Regional Growth Fund. The funding is linked to safeguarding existing jobs and creating 27 new positions over the next five years in the Company's R&D Centre in Lincoln, England.

16. APPROVAL OF THE FINANCIAL STATEMENTS

These interim condensed consolidated financial statements were approved by the board of directors of Dynex Power Inc. May 27th, 2014.
